

Kick Drum is a free collection of electronic kick drum samples crafted by 8-bit Logic, featuring 120 key labeled bass drum samples in total. Apart from the 120 drum samples in WAV format, the download also includes SFZ and NKI patches for each kick sample.

The provided patches are already mapped across the keyboard, making it easy to match the selected kick drum to the key of your project. Simply choose the kick patch, play the desired note on your MIDI keyboard or in the piano roll and you're done. This makes 99Sounds Kick Drum an absolutely perfect addition to our popular 99 Drum Samples collection.

Contents

120 kick drum samples

24-bit WAV format

SFZ/NKI patches

LICENSE

The included samples were crafted by 8-bit Logic and are royalty free for use in your music and other creative projects, both free and commercial. You are not allowed to redistribute these samples in any way, nor use them as the sound source in audio related software and/or sound libraries, free or commercial.
